

B2B Sales Lead Qualification & Proposal Agent Knowledge Base

1. Business Overview

Business Problem

B2B sales teams often spend **24–48 hours** responding to inbound leads and **2–4 hours** manually preparing customized proposals. During this delay:

- Qualified leads are lost to competitors.
 - Sales representatives spend excessive time collecting requirements.
 - Proposal quality varies between salespeople.
 - Manual lead qualification is inconsistent.
-

2. Agent Objectives

The AI agent should be able to:

- Respond to new leads within **30 seconds**
 - Collect customer requirements automatically
 - Qualify leads using the **BANT framework**
 - Score and prioritize leads
 - Recommend suitable products/services
 - Generate customized proposals
 - Generate preliminary pricing estimates
 - Schedule demo meetings
 - Sync all information with CRM
-

3. Lead Qualification (BANT)

Evaluate every lead using:

Budget

Can the customer afford the solution?

Example:

- Enterprise budget → High
- Unknown budget → Medium
- No purchasing budget → Low

Authority

Is the contact a decision maker?

Examples:

- CEO
- CTO
- Head of IT
- Procurement Manager

Need

Business pain points:

- Manual workflow
- Customer support overload
- Slow sales response
- High operational cost
- Poor data visibility

Timeline

Expected implementation:

- Immediate (<1 month)
- 1–3 months
- 3–6 months
- Future planning

4. Lead Scoring

Score every lead from **0–100**.

Score	Category	Action
80–100	HOT	Schedule demo immediately
50–79	WARM	Follow-up within 24 hours
0–49	COLD	Nurture campaign

5. Product Catalog

Each product should include:

- Product name
- Description
- Target customer
- Features
- Benefits
- Implementation time
- Recommended company size

Example

AI Customer Support Agent

Suitable for:

- Retail
- Ecommerce
- Banking
- Insurance

Features

- FAQ Automation
 - Human Handoff
 - Multi-channel Chat
 - Knowledge Base Search
-

Sales Lead Qualification Agent

Suitable for

- SaaS
- Consulting
- B2B Services

Features

- Lead Intake
 - BANT Scoring
 - CRM Sync
 - Proposal Generation
-

6. Pricing Rules

The agent **must not invent pricing**.

Pricing should come from predefined rules.

Example

Package	Company Size	Setup Fee	Monthly Fee
Starter	1–20 employees	\$2,500	\$499
Growth	20–250 employees	\$7,500	\$1,200
Enterprise	250+ employees	Custom	Custom

Additional pricing rules:

- Extra AI module
- CRM integration
- Custom workflow
- SLA level
- Implementation support

7. Solution Recommendation Rules

Recommend products based on customer pain points.

Example:

Pain Point

Customer receives 500+ support inquiries daily.

Recommend

- AI Customer Support Agent
- Knowledge Base
- Live Agent Handoff

Pain Point

Sales team spends hours qualifying leads.

Recommend

- Lead Qualification Agent
 - CRM Integration
 - Proposal Generator
-

8. Proposal Generation

Proposal should contain:

1. Customer Overview
 2. Business Challenges
 3. Recommended Solution
 4. Product Modules
 5. Expected ROI
 6. Estimated Timeline
 7. Preliminary Pricing
 8. Next Steps
-

9. Demo Scheduling

When a lead is classified as **HOT**, the agent should:

- Suggest available meeting slots
 - Create Google Meet / Zoom link
 - Send calendar invitation
 - Notify the assigned sales representative
-

10. CRM Synchronization

After every interaction, save:

- Company
- Contact
- Email
- Phone
- Industry
- Company Size
- Pain Points
- BANT Score
- Lead Category
- Proposal Generated
- Meeting Status

- Follow-up Date
-

11. Case Studies & ROI

Use relevant case studies when recommending solutions.

Example:

TechAsia Software

Before:

- 24–48 hour response time
- High demo drop-off

After PAL:

- Lead qualification in 30 seconds
 - Automatic demo booking
 - **35% increase in closed demos**
 - **Payback period <14 days**
-

12. Agent Guardrails

The AI agent must:

- Never fabricate pricing.
- Never promise unsupported features.
- Only recommend products available in the catalog.
- Ask follow-up questions when information is insufficient.
- Escalate to a human sales representative when requirements are highly customized or outside predefined offerings.
